

COLORS

The SRP is available in four color choices: Arctic White, Almond, Deep Brown and Sandtone. Although doors should not need repainting, if a custom color is required, our paint system provides an excellent base for any field applied paint.

Arctic White

Almond

Deep Brown

Sandtone

FACE DIMENSIONS

On 7' high doors, face dimension of the top and bottom rail is 5-1/2".

On 6'6" and 8'2" doors, face dimension of top and bottom rail is 2-1/2".

CUSTOMIZE YOUR DOOR WITH WINDOWS

Your SRP Garage Door is available with windows and a variety of design trims. Choose Standard windows or add Sunburst, Cascade, Cathedral, Colonial, Sherwood, or Waterton Trim. Suggested arrangements are shown at right, however other arrangements may be available. (Please note: Sunburst 2 panel is only available in limited sizes.)

- Color matched frames and design trim offer a clean, finished look.

- Trim inserts utilize a "snap-in" design for easy removal to clean glass.

10-YEAR LIMITED WARRANTY

In addition to the standard One Year Limited Warranty offered on all its products, General Doors Corporation warrants the door sections of its SRP model door against deterioration due to rust resulting from the paint finish cracking, spalling, or peeling in residential single family installations for 10 years from the date of delivery to the original purchaser. If your garage door does not conform to these warranties, notify the dealer from whom the door was purchased. If any door sections are found defective upon inspection by an authorized General Doors representative, General will replace or repair, at its option, the defective sections.

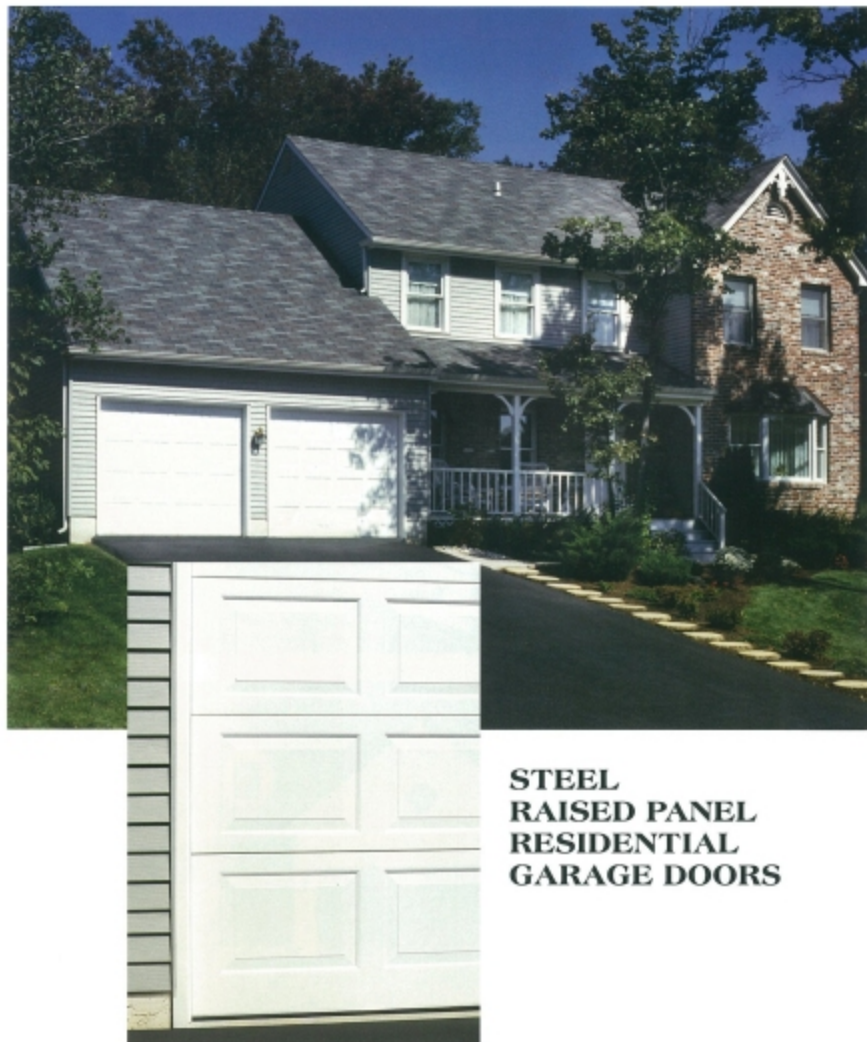

This warranty covers the door section(s) only, and does not apply to the other parts of the garage door or its operating hardware. This warranty also does not apply to any damage or deterioration caused by abuse, improper installation or handling, applied paint failure or failure to provide reasonable or necessary maintenance, alterations and/or additions to door, presence of foreign substances or atmospheric conditions including but not limited to coastal areas subject to excessive salt atmosphere. Labor charges for installations shall be the responsibility of the owner. General Doors is not liable for consequential or incidental damages, or for any other direct or indirect cause.

All warranties express or implied, including any warranty of merchantability are hereby expressly excluded. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

GENERAL DOORS CORPORATION

**STEEL
RAISED PANEL
RESIDENTIAL
GARAGE DOORS**

STEEL RAISED PANEL GARAGE DOORS

General Doors has captured the timeless elegance of a raised panel door and combined it with the durability, security and low maintenance of steel.

Compare our SRP model to any other steel door... the superior quality and appearance are obvious.

FEATURES

- The Steel Raised Panel model garage door is 2" thick and constructed with full 24 gauge steel (.022 thickness).
- The steel is rust-proofed with hot-dipped galvanizing, then pre-painted on both sides with an epoxy primer. A second coat of polyester finish is then baked-on to the exterior surface.
- 10 year limited warranty backed by General Doors... a company that has been building quality garage doors for the professional installer since 1947.
- Tog-L-Lock™ Fastening System provides strength to joints without burning or piercing the metal.
- A resilient, vinyl weather-strip is attached to the door bottom with an aluminum retainer to minimize air infiltration.

APPEARANCE

- The SRP model is available in 4 colors: Arctic White, Almond, Sandstone and Deep Brown.
- A finely detailed woodgrain surface with deeply embossed panels give a sharp, well-defined appearance.
- Each panel is precisely embossed to give the look of real wood, yet provides the durability and easy maintenance of steel.
- A rivet-free door surface creates a smooth, uniform look.
- Panel sizing and spacing are proportionate to each door size so that all sizes have an authentic raised panel look.

**GENERAL DOORS 24 GAUGE STEEL IS
17% THICKER THAN 25 GAUGE
31% THICKER THAN 26 GAUGE**

**FOR A STRONGER &
MORE DENT RESISTANT
DOOR CHECK THE GAUGE
AND COMPARE!**

**24 GAUGE MEANS
YOUR DOOR WILL
LOOK BETTER LONGER**

A diagram showing three vertical bars representing different steel gauges. The top bar is labeled '24 Gauge', the middle '25 Gauge', and the bottom '26 Gauge'. The 24 gauge bar is the tallest, followed by the 25 gauge, and the 26 gauge is the shortest.

OPTIONAL INSULATION

- Our factory installed 1-1/2" thick polystyrene insulation, with a calculated R-value of 6.66, increases energy efficiency while reducing noise levels. A rigid, white vinyl backing covers and protects the insulation and provides an attractive finish for the inside of the door.

TOP QUALITY HARDWARE

- Heavy-duty track with a unique elliptical curve reduces the force necessary to roll the door along the track making opening and closing easier and smoother.
- Full leaf, heavy gauge hinges offer superior strength and years of trouble-free operation.
- Full-width steel lock bars and a 5-pin cylinder lock assure security by holding the door closed on both sides.

**SPECIFY GENERAL DOORS,
BECAUSE QUALITY DOESN'T COST... IT PAYS!**
